DETAILED ACTION

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claim 1,6-10 is rejected under 35 U.S.C. 102(e) as being anticipated by Brusky et al., (U.S. Patent No. 6,111,569).

As per claim 1, Brusky shows a wireless peripheral for a receiver (element 70 in Fig.1):

a housing (In Fig.1 element 70); only one keyboard defined on housing (In fig.1), keyboard providing different functionalities depending on the orientation of housing (In Col.3 lines 11-45)(different functionality such as remote controller or mouse or keyboard In Col.3 lines 20-25); and a pair of wireless interface (In fig.1 element 70) that transmit

Art Unit: 2673

wireless signals directed at sufficiently spaced angles with respect to one another to enable receiver to distinguish one of signals from the other of signals (In Col.3 lines 14-25).

As per claim 6, Brusky shows a controller coupled to interface and keyboard (in fig.1 element 70).

As per claim 7, Brusky shows wireless interface are infrared interfaces (In Col.3 lines 10-12).

As per claim 8-10, Brusky shows wireless interfaces at an angle of 45 (In fig.1 element 70) or more and has two different orientation (In Col.3 lines 20-25).
